ABOUT ME

I am currently exploring deep learning and artificial intelligence in multidisciplinary areas. I have a good understanding of various neural networks like CNN, GANs, RNN, etc.
I also have a good amount of experience as an full-stack developer and UI/UX web designer. Currently looking for new opportunities to level up my skills.

EDUCATION

BITS PILANI, PILANI CAMPUS
Msc. Economics, BE in EEE
August 2019 - Present

SD JAIN MODERN SCHOOL
CBSE
2018| Surat, India

COURSEWORK

Machine Learning
Deep Learning
Convolutional Neural Networks
App Development
Web Development
Econometric Methods
Fundamentals of Finance and Accounting
Derivatives and Risk Management
Probability and Statistics

SKILLS

PROGRAMMING
Languages:
Python • Javascript • HTML/CSS•Dart Golang • C++ • C
Frameworks:
React JS • React Native • Flutter TensorFlow • PyTorch • NodeJS Django • Flask
Libraries:
NumPy • Pandas • OpenCV • SciPy MatPlotlib
Softwares:
Adobe Illustrator • Figma • Adobe XD Autodesk •

EXPERIENCE

MCEME, SECUNDERABAD | Research Intern
May 2021 – Aug 2021 | Remote
- Worked on a speech recognition using AI to understand human speech and convert speech to text.
- Developed Chinese text to Hindi text translator with LSTM based model with a maximum BLEU score of **0.32**.

ILRNU INC. | Fullstack Developer
Oct 2020 - December 2020 | Remote
- Worked with the team on the 2.0 update of the website refactoring the current design and adding new features
- Migrated website database from mySQL to mongoDB collections.

STUDENT WELFARE DIVISION | Software Developer
Jan 2021 - May 2021 | BITS Pilani
- Developed a portal for BITS Pilani for registrations for MCN scholarship offered by the institute.
- Improved the user experience of approximately 5000 students applying for MCN scholarship.

PROJECTS

DRONE-BASED MONITORING OF INDIAN ROADS
Dec 2021 – Present | Prof. Pratik Narang
- Working on a system to detect road damages using drone images.
- Aiming for real time prediction of road cracks using the dataset collected by the drone.
- Implementing the current design using the GANs, CNN and Detr object detection algorithm, the final deployment will be in python.

WORK DISTRACTION ANALYZER
Mar 2022 – Present | Independent
- Working on a system to detect and analyze the work productivity graph through there browser app usage activity and show recommendation to improve productivity.

CHINESE TO HINDI SPEECH CONVERTER
May 2021 - Sept 2021 | Prof. Rahul Singhal
- Worked on making a speech recognition system to convert the chinese speech to hindi speech using RNN and LSTM

POSITION OF RESPONSIBILITY

DEPARTMENT OF VISUAL MEDIA | Coordinator
Aug 2019 – Present | BITS Pilani
- Worked as a team lead for conducting the BPL 2022
- Developed various websites and web applications for the college fests

NATIONAL SOCIAL SCHEME | Coordinator
Aug 2019 – Present | BITS Pilani
- Planned and organized the first online educational initiative in the organization for class 6th to 10th students, organised 3 day long series on Cybersecurity
